REMOVAL

WARNING

Before proceeding with any work on the bike, make sure it is turned off and the charger disconnected.

- 1 Install the side stand spring bracket with the torx M5x16 bolt, M5 bushin and a washer into the side stand leg, torque bolt to **5Nm**.
- 2 Install the remaining M5x16 bolt, with bushing and washer into the threaded hole behind the left side pate of the bike, torque bolt to **5Nm**.
- 3 Make sure the widest part of the bushing is against the bolt's head so the spring cannot slide off.
- 4 Place the two o-rings provided into the main sidestand bushing's cuts.
- 5 Take one of the two side stand bushings provided and push it into the main side stand bushing.
- 6 Install the side stand bracket onto the bike with the two supplied M8x20 bolts and torque to **20Nm**.
- 7 Place the main stand bushing through the front side stand leg hole, and press the remaining bushing from the other side.

- 8 Use a soft hammer to punch the bushings in place.
- 9 Place the side stand in the bracket and use supplied bolt M8x24 to fix the sidestand in place, torque bolt to **35Nm**.
- 10 Insert the small spring into the other, hook it in the side stand spring bolt and with the help of the spring hook, hook it to the side stan's spring bracket hole.
- 11 Remove the spoiler assembly.
